

WESKO LAUNCHES COMPLETE LINE OF LOCKING PRODUCTS FOR WOOD FURNITURE MANUFACTURERS

Toronto Canada – March 4, 2011. Wesko Locks announced today that Wood Furniture Manufacturers can now look to Wesko for all their locking system requirements. Wesko has been supplying locking systems to the office furniture industry for 35 years. Now Wood Furniture Manufacturers can receive the same high quality parts and great service with the lowest prices in the Industry.

Wesko's Woodline products are interchangeable with products from other manufacturers which makes conversion easy to manage.

Wesko's Woodline has many new innovations giving our customers competitive advantage:

- All-in-one anti-tip and locking system supporting more than 4 drawers.
- Lockbar and anti-tip systems come pre-assembled on one channel with no loose components.
- Central Locking Systems for all major Lateral Filing Systems.
- Safe-T-Tenon Lock simply and cost effectively ensures alignment on drawer installed locks and prevents damage through misuse or tampering.
- File frame system for wood drawers supporting legal, letter and lateral file drawers.
- Solid zinc construction, mechanical combination locks with override master key (no batteries).

"2010 was our biggest year ever for new product development", says Florian Westwinkel President of Wesko Locks. "What's really driving our 2011 business is that our Woodline is interchangeable with our customers' existing suppliers so they can convert components on their schedule. They can take advantage of our high quality parts, innovative new features and still reduce their costs. With rising commodity prices globally manufacturers are looking to reduce costs any way they can".
